ACKNOWLEDGEMENT

The satisfactions that accompany the successful completion of any task would be incomplete without mentioning the people who made it possible by their constant guidance and encouragement crowned our efforts with success. We are grateful to our **Chairman Shri. M.V.Muthuramalingam** and our **Director Shri. M.V.M.Sasikumar** for facilitating us with this opportunity. Our sincere thanks to **Advisor's Shri. K.Razak** and **Shri.M. Vasu** , **Principal Dr.N.Balaji** ,**Vice Principal Dr. S. Soundarajan** for their support. Our respected **Head of the Department of Electronics and Communication Engineering Dr.B. Sridevi**, Project Evaluator **Dr. R. Jothi Chitra** and **Dr.M.Sivarathinabala** and our **Industrial mentor Sai Priya** deserve a special note of thanks and gratitude for having extended their fullest cooperation and continuous suggestions to make this project successful. We also thank all the faculty members of Electronics and Communication Engineering department for their help during the course of this project. We also like to express our gratefulness to our beloved parents and our family members who have always provided backup with their unending moral support and of course momentary help too which we believe are the driving forces for the completion of the project.

Harikrishnan S (Lead)
Bharath k
Karthikeyan b
Yuvaraj p

ABSTRACT

Everyone has the right to freedom of speech. However, this right is being misused to differentiate and attack others, physically or verbally, in the name of free speech. This discrimination is known as hate speech. Hate speech can be well-defined as language used to express hate towards a person or a group of people based on characteristics such as race, religion, ethnicity, gender, nationality, disability and sexual orientation. The increasing usage of social sites and information sharing has specified major benefits to humanity. However, this has also assumed rise to a variety of challenges including the spreading and sharing of hate speech messages. Thus, to solve this emerging issue in social media sites, recent studies employed a variety of machine learning and deep learning algorithms with text mining algorithm to automatically detect the hate speech messages on real time datasets. Hence, the aim of this Project is to analyses the comments on social networks using Natural Language processing technique (NLP) and Deep learning algorithm named as Back propagation neural network algorithm. Using NLP technique, can extract the keywords from user generated content and implement Back Propagation neural network to classify the text whether it is positive or negative. If it is negative means, automatically block the comments as per user wish and also block the friends based on pre-defined threshold values. Experimental results shows that the proposed framework implemented in real time social network site with improved notification .

News Tracker Application

1.INTRODUCTION

Mobile app ecosystems are transforming patterns of news consumption. Until quite recently, reading the news was a niche use for smartphones [12], mostly for when users were ‘on the go’; now however, two in every three users of mobile devices in the US regularly access news and as many as one in five read in-depth news articles daily [2]; a similar picture is found in the UK [1]. This growth in mobile news access continues the migration of news consumers to the Internet.

1.1 Project overview

As news is increasingly accessed on smartphones and tablets, the need for personalising news app interactions is apparent. We report a series of three studies addressing key issues in the development of adaptive news app interfaces. We first surveyed users’ newsreading preferences and behaviors’; analysis revealed three primary types of reader. We then implemented and deployed an Android news app that logs users’ interactions with the app. We used the logs to train a classifier and showed that it is able to reliably recognise a user according to their reader type. Finally we evaluated alternative, adaptive user interfaces for each reader type. The evaluation demonstrates the differential benefit of the adaptation for different users of the news app and the feasibility of adaptive interfaces for news apps.

1.2 Purpose

As our lives are very busy these days, we often feel we need more than 24 hrs. a day to cope up with everything we have in our schedule. Well, that's not possible but reducing the time by changing the conventional method of reading news can help. Just tell us what market news you're interested in and get a quick peek for the day. Only read what you feel is relevant and save your time. This app helps you to query for all information about Indices, Commodities, Currencies, Future Rates, Bonds, etc.... as on official websites.

2. LITERATURE SURVEY

2.1 Existing problem

We often feel we need more than 24 hrs. a day to cope up with everything we have in our schedule. Well, that's not possible but reducing the time by changing the conventional method of reading news can help.

2.2 References

Like articles, websites, blogs.

<https://www.researchgate.net/>.

<https://techvidvan.com/tutorials/android-news-app-project-source-code/>

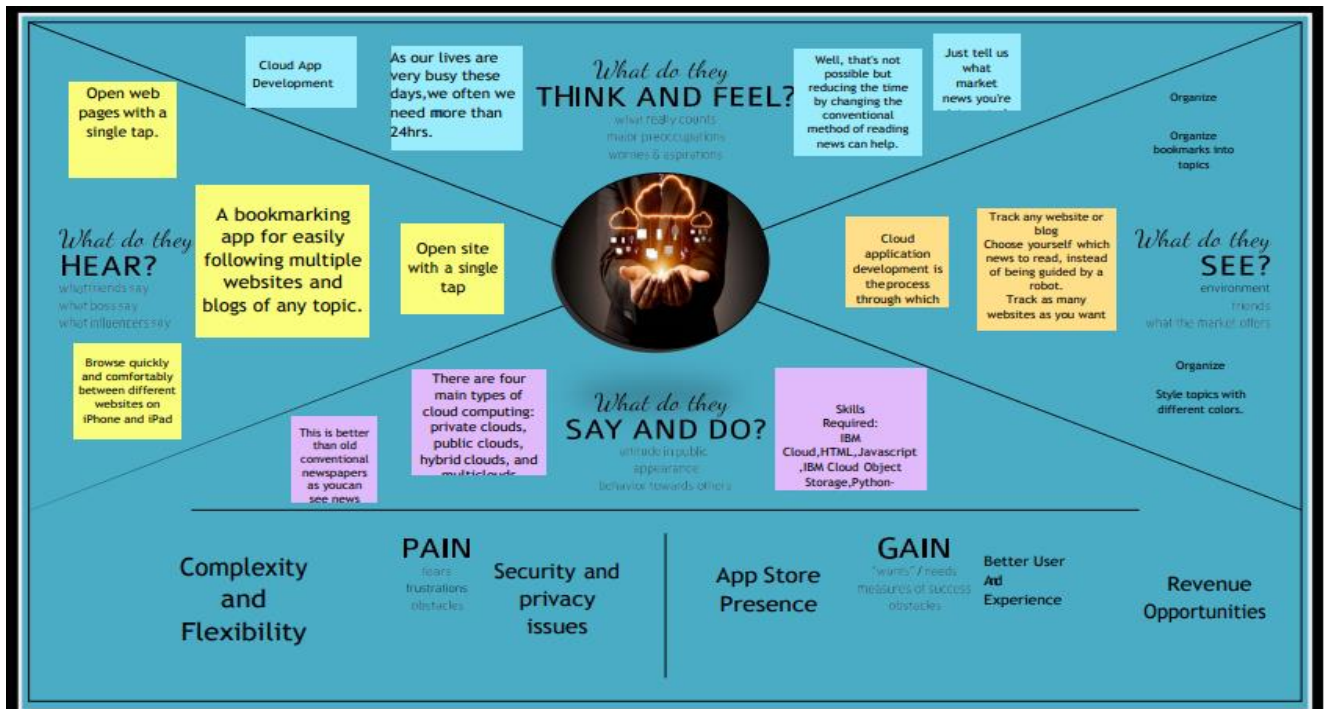

<https://www.ripublication.com/>

2.3 Problem Statement Definition

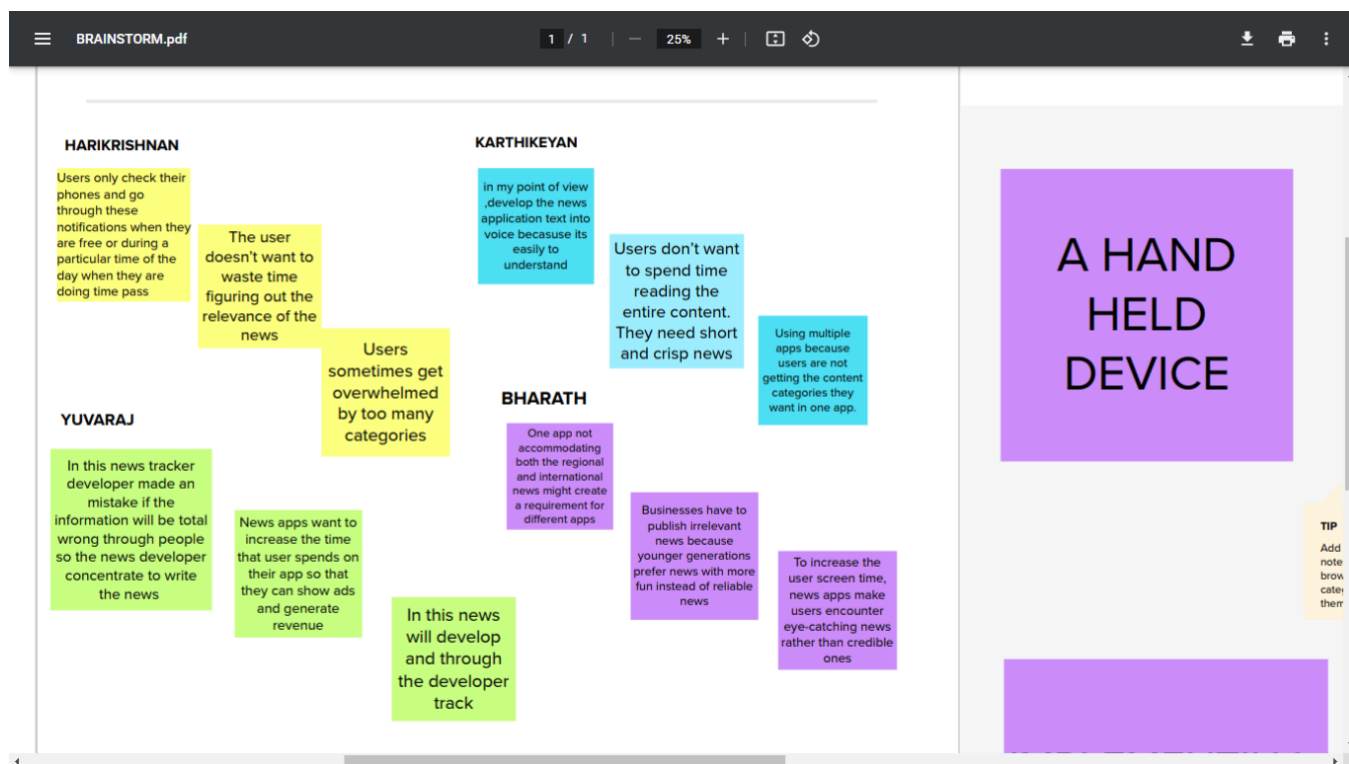

- 1.The user needs a way to organize the news on daily basis so that he can cope up with daily events in his tight schedule.
- 2.The user wants to read news only about particular topics so that he can be informed about his interest.
- 3.The user wants to get informed from only certified news outlets .
- 4.The user needs a way to search about the news on topics he wants to.
5. The user wants to know the news about his surrounding using GPS location.

3. IDEATION & PROPOSED SOLUTION

3.1 Empathy Map Canvas

3.1.2 Ideation & Brainstorming

3.2 Proposed Solution

S.NO	PARAMETERS	DESCRIPTION
1.	Problem statement (problems to be solved)	In our daily life, we come across various events of local as well as national importance, and to know it, we take the help of NEWS. But recently we realized there is no such common platform that provides both. So we found a Social Need and built a platform that helps to solve the problem.
2.	Idea/solution description	There are many news apps available that can keep you abreast of the latest happenings. When you want news from multiple sources, try New shunt, Pulse, Flip board , Zite . News Republic and News 360.The other alternatives of course are the dedicated news apps from media sources/publications. For instance , The Economic Times and Times of India have free apps across platforms
3.	Novelty/Uniqueness	In our daily life, we come across various events of local as well as national importance, and to know it, we take the help of NEWS. But recently we realized there is no such common platform that provides both. So we found a social need and built a platform that provides such news in form of short videos that are taken from them out trusted resources in the world.

4.	Social Impact/Customer satisfaction	Mobile devices have changed the way everyone lives. Here is a list of some amazing Social Good apps that can be used for a variety of different things. Some of these apps can be used on a day to day basis, others can be used for research, and some can be used to educate. No matter the reason, these mobile apps gives you the ability to stay consumer conscious And socially involved in every facet of your life
5.	Business Model (Revenue)	News apps are trying to be Model) like social media apps Businesses have to publish irrelevant news because younger generations prefer news with more fun instead of reliable news. News apps want to increase the time that user spends on their app So that they can show ads and generate revenue.
6.	Scalability of the solution	<ul style="list-style-type: none"> • Better user experience • Cost-effectiveness • Stable performance • App customization • Project growth

3.3 Problem Solution fit

Project Title: News Tracker Application		Project Design Phase-I - Solution Fit		Team ID: PNT2022TMID24457	
Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS From young people to old people From working professional to jobless person From poor to rich From village people to city people Every one reads news now-a-days.	Focus on J&P, cap into	6. CUSTOMER CONSTRAINTS CC No network, Provide Download option No well organized content No related and interesting and educating content Click Bait(Topic and content are not related) Annoying user interface No customization option	Explore AS, differentiate	5. AVAILABLE SOLUTIONS AS User can customize what content to read and can search contents Chat bot that solves user queries Providing quick access to favorite topic User friendly interface, avoiding misleading ads Prioritize news according to user interest and location.
	2. JOBS-TO-BE-DONE/ PROBLEMS J&P Reading unwanted and irrelevant and repeated content Bad user interface Searching related news Misleading Ads and unorganized contents user unable to customize news content Using internet for previously watched content Forced notifications and ads Providing dark mode		9. PROBLEM ROOT CAUSE RC No user customization. This leads to unorganized and uninterested news. No search bars leads frustration to search contents No service to complain(Chat bot solves queries.) No download option user may not have internet. Light mode may not good for eye. User interface needs to be attractive and easy to use or it make user to lose interest on app Provide notification which related to user wish		7. BEHAVIOUR BE User searching news and wasting time on it User gets frustrated while using bad user interface Misleading ads or topics wasting user time and confuse user User need all types of content but needs their favorite content to be prioritized. User may feel stressed eye. User may avoid notification if it is not related.
Identify strong TR & EM	3. TRIGGERS TR People asking about latest news When things goes viral When need report about weather, market, sports and etc	Extract online & offline CH of BE	10. YOUR SOLUTION SL Providing search bars and content customization tiles Enabling download options and save or pin post options Providing Chat bot Providing Dark Mode Providing like, comments, tag, polling options to develop to develop user interface further more. User can control their notification. They can select content which they need to notified		8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE User can customize their news according to their interest. User can interact with community feed and user can report any queries 8.2 OFFLINE User can save post and then read it for later User can download post and can share it to other people.
	4. EMOTIONS: BEFORE/AFTER EM Feels waste of time to read irrelevant content Feels frustrated about misleading news Feels getting lack of information from contents				

4. REQUIREMENT ANALYSIS

4.1 Functional requirement

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through website.
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	User Login	Login through browser directly by entering username and password Login through Login through email
FR-4	User interaction	Done through user interface between client and server View the related news by subscribed or requested page.

4.2 Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

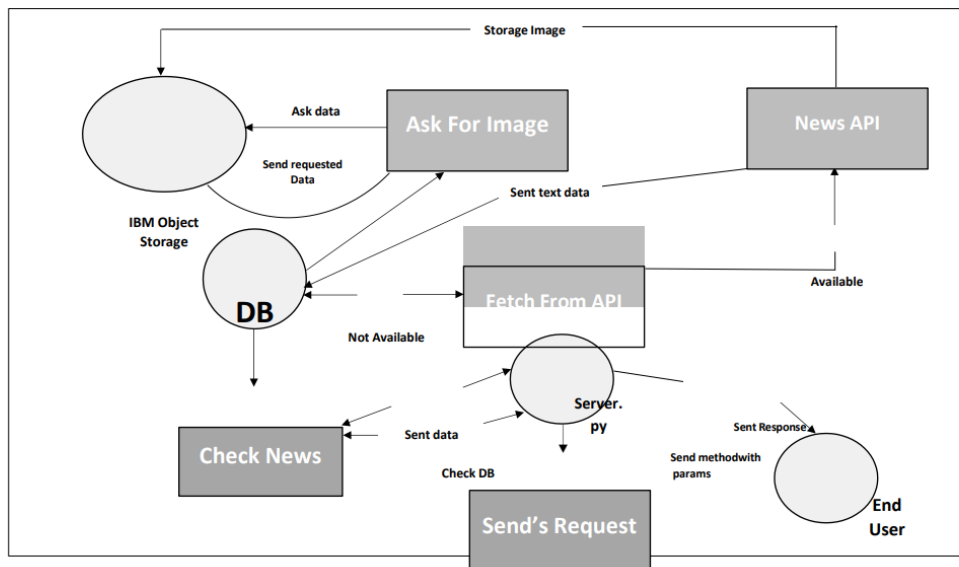

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	End users can receive push updates for new content on a site by subscribing to the site's news feed
NFR-2	Security	How well are the system and its data protected against attacks
NFR-3	Reliability	How often does the system experience critical failures? How much time does it take to fix the issue when it arises ?And how is user availability time compared to downtime?
NFR-4	Performance	Performance is the core non-functional requirements no system can do without.It defines how fast a software system or a particular piece of it responds to certain users actions under a certain workload. In most cases, this metric explains how long a user must wait before the target operation happens (the page renders, a transaction is processed, etc.) given the overall number of users at the moment. But it's not always like that. Performance requirements may describe background processes invisible to users, e.g. backup. But let's focus on user-centric performance.
NFR-5	Availability	Availability describes how likely the system is accessible to a user at a given point in time. While it can be expressed as an expected percentage of successful requests, you may also define it as a percentage of time the system is accessible for operation during some time

		<p>period. For instance, the system may be available 98 percent of the time during a month. Availability is perhaps the most business-critical requirement, but to define it, you also must have estimations for reliability and maintainability.</p>
NFR-6	Scalability	<p>Scalability assesses the highest workloads under which the system will still meet the performance requirements. There are two ways to enable your system scale as the workloads get higher: horizontal and vertical scaling.</p>

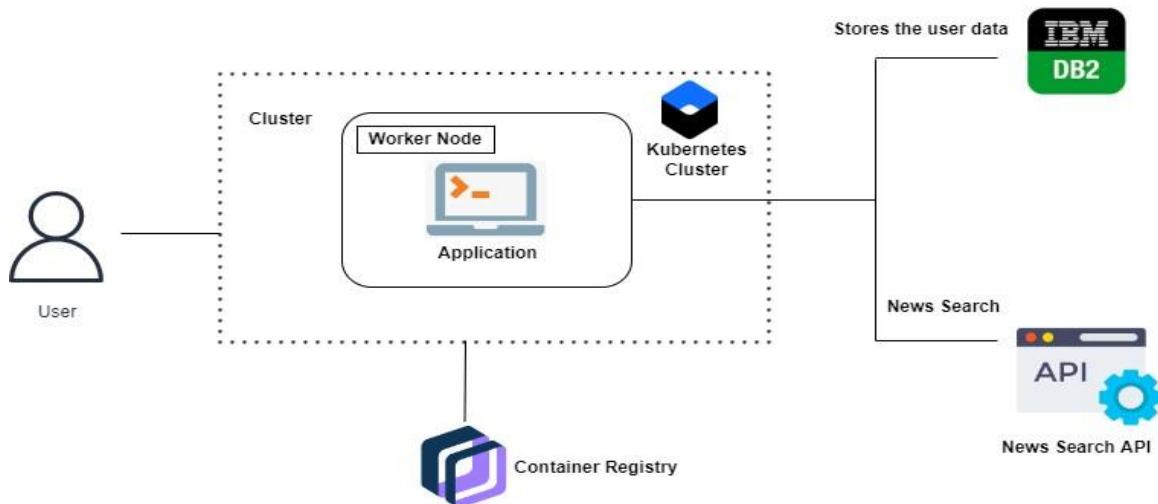

5. PROJECT DESIGN

5.1 Data Flow Diagrams

Dataflow Diagram

5.2 Solution & Technical Architecture

5.3 User Stories

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail	I can register & access the dashboard with Gmail Login	Low	Sprint-2
	Login	USN-5	As a user, I can log into the application by entering email & password	I can view all types of information through this application	High	Sprint-1
	Dashboard	USN-1	As a user, I can log into the application and look into my dashboard	I can Look into My Dashboard After my login	Low	Sprint-1
		USN-2	As a user, I can log into the application and update my personal data	I can View the personal data which can be updated by the user	Low	Sprint-2
		USN-3	As a user, I can log into the application and read news based on my filter contents	News contents are filtered based on the user needs	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Web user)	Login	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password through web applications such as Chrome, Firefox, brave, Operamini etc.	I can access my account / dashboard	High	Sprint-1
Customer Care Executive	Dashboard	USN-1	As a user, I can Report to the customer service about the error or doubt of the application by calling to the customer service which is provided in the application help box	I can report to the customer service if I am facing an issue or I didn't know anything about the application	High	Sprint-1
		USN-2	As a user, I can Report to the customer service about the error or doubt of the application by emailing to the customer service which is provided in the application help box	I can report to the customer service if I am facing an issue or I didn't know anything about the application	High	Sprint-1
Administrator	Application	USN-1	Application administrator will rectify the error caused in the application as soon as possible and provide a patch update in order to have an error free software	I can report to the customer service what the issue has been faced and they might rectify by releasing patch updates	High	Sprint-1

6. PROJECT PLANNING & SCHEDULING

6.1 Sprint Planning & Estimation

TITLE	DESCRIPTION	DATE
Literature Survey & Information Gathering	Literature survey on the selected project & gathering information byreferring the technical papers, research publications etc.	6 OCTOBER 2022
Prepare Empathy Map	Prepare Empathy Map Canvas to capture the user Pains & Gains, Prepare list of problem statements	6 OCTOBER 2022
Ideation Brain Storming	List the by organizing the brainstorming session and prioritize the top 3 ideas based on the feasibility & importance.	6 OCTOBER 2022
Proposed Solution	Prepare the proposed solution document, which includes the novelty, feasibility of idea, business model, social impact, scalability of solution, etc.	6 OCTOBER 2022
Problem Solution Fit	Prepare problem solution fit document	17 OCTOBER 2022
Solution Architecture	Prepare solution architecture document.	17 OCTOBER 2022
Customer Journey	Prepare the customer journey maps to	17 OCTOBER 2022

	Understand the user interactions& experiences with the application (entry to exit).	
Data Flow Diagrams	Draw the data flow diagrams and submit for review.	17 October 2022
Technology Architecture	Prepare the technology architecture diagram.	17 October 2022
Prepare Milestone & Activity List	Prepare the milestones & activity list of the project.	3 NOVEMBER 2022
Project Development - Delivery of Sprint-1, 2, 3 & 4	Develop & submit the developed code by testing it.	IN PROGRESS..

6.2 Sprint Delivery Schedule

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	2	High	harikrishnan
Sprint-1		USN-2	As a user, I will receive confirmation email once I have registered for the application	1	High	karthikeyan
Sprint-1		USN-3	As a user, I can register for the application through Facebook	2	Low	bharath
Sprint-1		USN-4	As a user, I can register for the application through Gmail	2	Medium	Yuvaraj,bharath
Sprint-1	Login	USN-5	As a user, I can log into the application by entering email & password	1	High	Harikrishnan,karthikeyan
Sprint-2	Dashboard	USN-6	As a user I should be able to navigate and access all the features hassle free	2	High	Harikrishnan,karthikeyan
Sprint-2	Layout	USN-7	As a user I should be able to access the portal with different devices with the same comfort	2	High	Harikrishnan,karthikeyan
Sprint-3	Data Store and retrieval	USN-8	Get Data from API and store as JSON in DB2	3	High	yuvraj,karthikeyan
Sprint-3		USN-9	Get bin data from API and store in DFS	2	High	Hari,bharath,yuvraj

Sprint-4	User Segregation and data access	USN-10	As a CC executive I should be able to uniquely identify the customer and offer help	1	Low	karthikeyan
Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-4	Change code	USN-11	As a administrator I should be able to modify code according to the future requirements.	2	Medium	Harikrishnan,yuvraj
Sprint-4	Monitor the system	USN-12	As a administrator I should be able to monitor the cloud system and fix errors before customer.	1	High	Hari,karthi,bharath,yuvraj

6.3 Reports from JIRA

```

8. TESTING

8.1 Test Cases

News Tracker Application									
2 / 4	100%								
Test case	feature	component	Test scenario	Expected result	Actual result	status	comments	bug	Executed by
Sign in	Functional	Login page	Verify user can see the sign in option	can visible	Yes visible	pass	successful	-	HARIKRISHNAN
Sign up	Functional	Login page	Verify user has the option to sign up	Can visible	Yes visible	pass	Successful	-	KARTHIKEYAN
Forgot password	Functional	Login page	Verify user has the option to forgot password	Yes the option is available	Option is available	pass	Successful	-	BHARATH

Fetch news	Functional	Home page	Verify user can get the news	News will be feed to the app	404 error	Fail	unsuccessful	App integration problem	Ragul rathna, Ashwin
Types of news available in the fetch news page	Functional	Fetch news	Types of news available	Weather, Sport, Economy.	Hover buttons will be Shown.	Yes	successful	-	YUVARAJ, BHARATH, KARTHIKEYAN, HARI

Result:

News tracker application using cloud is developed and executed at the level of completed progress .

10. ADVANTAGES & DISADVANTAGES

Advantages:-

- ❖ In this app news is already categorization.
- ❖ Easily accessible and portable.
- ❖ Better user experience.
- ❖ Apps help you convert visitors to loyal readers.
- ❖ Minute by minute updates of news.
- ❖ This app helps you to get local news updates instantly.
- ❖ To explore and discover trending news and topics.
- ❖ News feeds for you based on your interest.

Disadvantages:-

- ❖ Some apps demand premium subscription from user.
- ❖ Occurance of Advertisement disturb the user.
- ❖ Sometimes the news gives brief information.
- ❖ Prevalance of fake and uncertain news can confuse the user lead to misconception.
- ❖ Fake news may mislead the readers.

11. CONCLUSION

We explored the feasibility of recognising patterns of news reading interactions and evaluated three adaptive interface designs for different news reader types. We show that from their interaction log, a specific user can be recognised as one of three kinds. The reader types emerging from the online survey are well defined and distinct. The evaluation of the three variant interfaces suggests that different news reader types need different user interfaces. We have demonstrated a method for monitoring users' news reading behaviour and inferring news reader type from it. In the future we will further explore the design of adaptive interfaces, in order to be in a position to demonstrate a complete adaptive mobile news framework providing automatic personalisation of news apps.

12. FUTURE SCOPE

In the future we will further explore the design of adaptive interfaces, in order to be in a position to demonstrate a complete adaptive mobile news framework providing automatic personalisation of news apps.
